2014

### **BURG WÄCHTER PRESENTS 'THE HOME OF SECURITY'**

### **AT SECURITY ESSEN 2014, 23<sup>rd</sup>-26<sup>th</sup> September**

Security Essen is the world's leading fair for security and fire protection and has been running for 40 years. Burg Wächter will be a major presence at this show with a 700m<sup>2</sup> stand: 'The Home of Security' (Stand GA 139 in the Galleria). It will show for the first time all Burg Wächter's group of companies and brands, including Sterling Locks from the UK.

Visitors to the stand will be able to view all the new products and innovative developments from Burg Wächter. The stand provides the opportunity to review the entire range of security products and solutions covering safes, video surveillance, post boxes, padlocks and TSE access control systems.

For customers looking for inspiration, innovation and breadth of offer, the Burg Wächter's 'Home of Security' stand will show the latest technology, for instance connecting smartphones to security access systems. SECUENTRY is a new locking system utilising bluetooth, RFID and NFC technologies in one system to revolutionise door security.

There will be technical experts on hand to discuss the ground breaking developments in detail. Visitors will also have the opportunity to trial and experience the products first hand. It will therefore be the perfect opportunity to select those products that will successfully drive sales for the future and demonstrate why Burg Wächter can deliver real opportunities to your business.
